OVERVIEW

I'm a passionate full-stack developer who fell in love with coding after diving into it — not before. What began as curiosity turned into dedication, especially when I wrote my first JavaScript program. Since then, I've built full-stack projects using modern libraries and frameworks like **React**, **Next.js**, **Node.js**, and **MongoDB**.

Alongside full-stack development, I actively code in **C++** and sharpen my problem-solving skills on platforms like **LeetCode**, **Codeforces**, and **HackerRank**. I'm constantly exploring better logic, cleaner code, and new technologies to grow as a developer every day.

SKILLS

- **Programming Languages :** C++, C, JavaScript, TypeScript
- **Frontend :** React, Next.JS, Redux, Tailwind CSS, ShadcnUI
- **Backend :** Node.JS, Express.JS, MongoDB, Mongoose
- **Tools :** Postman, Git, GitHub, VS Code
- **Soft Skills :** Communication, Team work, Hard work, Adaptability, Time Management

PROJECTS

SwapNest [Live](#) [Link](#) [GitHub](#) [Client](#) [GitHub](#) [Server](#)

SwapNest is a modern web platform designed to simplify the exchange of second-hand goods. It connects users in a secure and user-friendly environment, making it easy to buy and sell.

Features

SwapNest is a comprehensive platform for second-hand product exchange. Users can create accounts, list used items, manage listings, and add products to a wishlist. Buyers can browse by category, filter results, contact sellers, and securely complete transactions—all from an intuitive, user-friendly interface.

Tech Stack

Next.js, TypeScript, ShadcnUI, Node, Express, MongoDB

Papyrus [Live](#) [Link](#) [GitHub](#) [Client](#) [GitHub](#) [Server](#)

Papyrus is an e-commerce platform for stationery products. It allows users to browse a wide range of stationery items, add them to cart, and make secure payments.

Features

Users can sign up, log in, and manage their profiles securely. They can browse products by category, add items to a shopping cart, and complete purchases using secure Shurjopay payment integration. The platform supports order tracking, allowing users to view past orders and check current statuses. Admins can manage products, orders, and users through a dedicated dashboard.

Tech Stack

TypeScript, Redux, ShadcnUI, Node, Express, MongoDB, Shurjopay

EDUCATION

BSC in Computer Science and Engineering

January 2024 - December 2027

CGPA : 3.91
